

HÔTELS VILLEGIA THINKS GREEN!

Committed to the environment and reducing its ecological footprint, Villegia has implemented many sustainable practices over the years. Here are a few:

Our hotels are equipped with multiple **RECYCLING BINS** (cardboard, bottles, glass...)

Our chefs favor **LOCAL SUPPLIERS** and **PRODUCTS**.

We encourage a thorough **FOOD SURPLUS** management. (compost...)

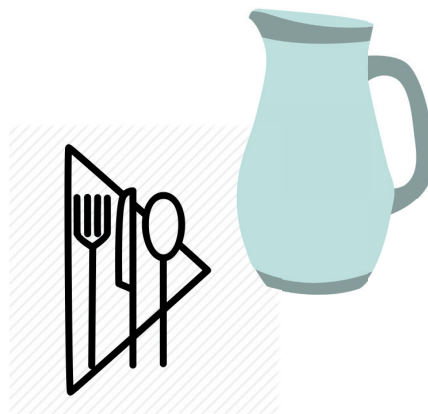

Our hotels are equipped with **BI-ENERGY HEATING SYSTEMS**. (natural gas/electricity or propane/electricity)

We promote **RIGOROUS WATER MANAGEMENT** : washing towels on customer request, parsimonious watering, etc.

We distribute the hotel **FURNITURE** - that does not meet the quality standards of a 4-star establishment - to different local organizations.

When planning events, we encourage our customers to favor:

- * **WATER PITCHERS** instead of bottled water.
- * **REUSABLE UTENSILS & TABLECLOTH.**

We use **ORGANIC CLEANING PRODUCTS**.

ENERGY SAVING:
We make sure to turn off lights and heat in unused rooms, etc.

In order to optimize our environmental contribution, we instill a **CORPORATE CULTURE** advocating customer satisfaction AND respect for the environment.
